

DON'T ADD

FOOD

TO THE FIRE

1/3 of all food produced globally are **NEVER EATEN**

When it comes to combating climate change, we often tend to overlook one of the most mundane yet significant driving force behind global warming - **FOOD WASTE.**

= 8% OF GLOBAL GHG EMISSIONS

THAT'S NOT ALL

FOOD WASTE IS BEYOND JUST WASTING FOOD

LAND

FRESH WATER

ENERGY

OTHER RESOURCES

Global food systems account for **37%** of GHG EMISSIONS.

IN SINGAPORE

EXPECTATION VS. REALITY

4 IN 5 THOUGHT our food waste was actually **10-100 TIMES SMALLER**

EQUIVALENT TO

the weight of

54,000x

DOUBLE-DECKERS

AMOUNT INCINERATED

The **2ND LARGEST WASTE** AFTER PLASTICS
