AMANDA LEE PING PING

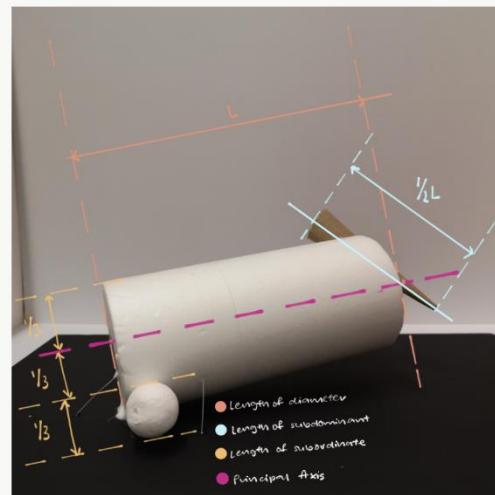

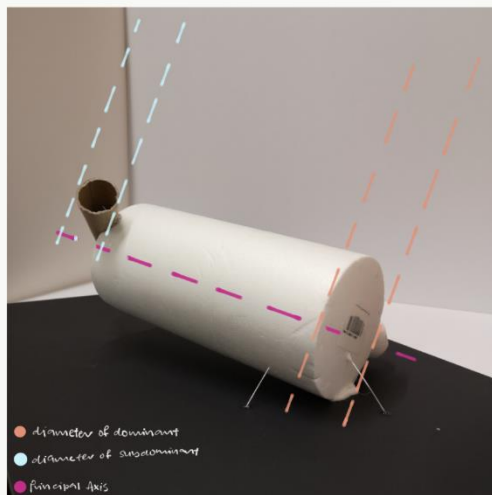

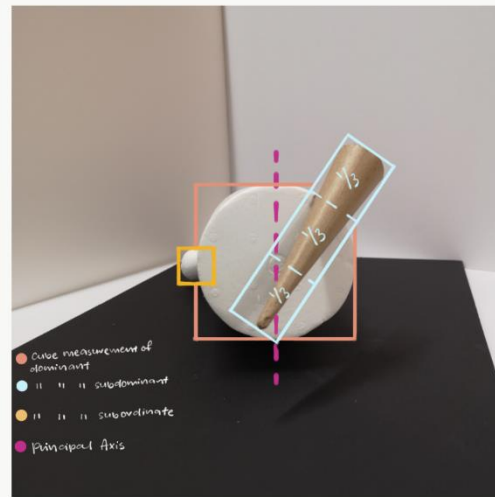

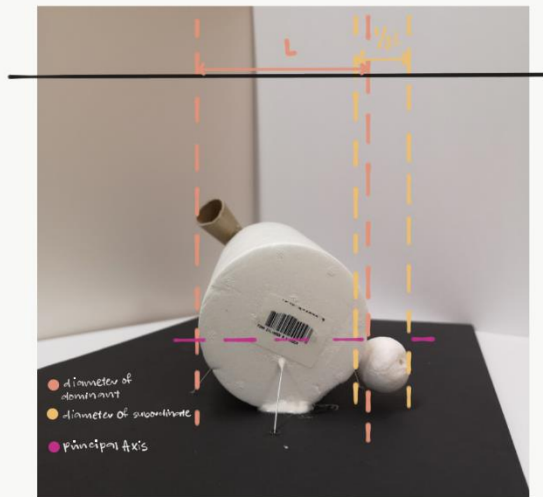

GAIA'S
IKEBANA
SPRING

FINAL MODEL

In this final model I have decided to use the cylinder as my Dominant, while wedging my cone (SD) and supporting the base with my sphere (SO). This model is a little similar to my second model but I decided to play with balance a bit more.

FINAL MODEL 2D SKETCH ANALYSIS

CREATION OF THE DESSERT

-----*A cherry blossom picnic*-----

This dessert enables one to feel the sweet tastes of assorted fruits and Japanese mochi, giving the atmosphere of the enjoyment of a dessert while watching the cherry blossoms of spring.

Top view with another groupmate's food model

Some improvements could have been made by changing the fruit wrap cone to an ice cream cone as the scale was too big as compared to the D. And as compared to my foam model, it has to be propped up on the cylinder.
