Update

Steps / Action Descriptions

1. Go to **DASHBOARD**, click **CREATE** a Shortcode.
2. In the OSS Post Aggregator menu, fill it out in the following way:
 - **Title:** (Leave Blank)
 - **Aggregation Source:** Registered Students
 - **Featured Image:** yes
 - **Layout:** 4 columns

Child Categories: This is important as this is where you put the category that you have asked your students to assign to their posts for a specific project. (In the example the category the students used was called "Research"). Please note that the categories are case sensitive.

Posts per Page: This can be changed according to the number of students in the class.

Meta Information: Make sure that only the "Post Title" is selected in the Meta Information.
