# Chromatic Fantasies: Mid-term Presentation

# Ominousness of Nature

- Nature's breath
- Larger than life
- Uncontrollable
- Immense power

*Awareness*  
*Fear*  
*Acceptance*  
*Relief*

A distinct awareness of the immense power that nature possesses that human beings can never fully comprehend. An innate fear for its vastness in oceans, space, valleys and the tectonic plates that can shift countries. The fear of being microscopic and have your existence be meaningless.

A certain relief and release in accepting all this.

# Sounds of Nature

## Sounds

- Sea Organ
- Aeolian Wind Harp

Instruments played by natural forces.

Playing force of the instruments are uncontrollable while the tuning was constructed and engineered by humans.  
Channelling natural forces with engineering.
