/

ENTANGLEMENT

MORTALS OF
THE
UNIVERSE

CONCEPT BEHIND THE TOPIC

I had an interesting convo with my father, someone who has been guiding me spiritually and religiously since young. We had a deep conversation about the universe. It was a question I had with all the “what ifs”. Mainly, “what if the universe was just a blank canvas and human beings are simply black dots or colours filling it up?”

I was asked to think deeper — “what if we were actually placed here to find our way back to our creator, but somehow couldn’t because none of us has found our way back and so life and death becomes a cycle”

We don’t belong to our parents; they might simply just be foster parents for as long as our time given here in the universe. The universe is just a fabrication. The real parent is the one who created us. Just for once think — maybe you and I, we have our universe to get back to. Our real home.

I'm relating this to how it is human nature for us to love. I believe we are here on Earth to find our Other. There must be a reason why we can connect strongly with a person, but when it comes to 'love' it's even stronger. We are built to find our Other. We are separated here on Earth, only to find our way back together.

I believe we are initially and supposedly an entity, an inseparable whole, before being placed on Earth. Perhaps we are just simply lost beings stuck here in this fabrication. That's when we have to find each other — the term 'entanglement' comes in when two beings finally found each other.

INSEPARABLE BEINGS

INSEPARABLE BEINGS

For the “Superposition” aspect, it is defined as “to describe the movement of particles when it has no real-world equivalent.” To simply put, not here, not there, not nowhere, not everywhere.

I understood it very well when I relate it to a spiritual level. What if we humans are the particles? We are just simply put here to grow and find our way back to our Creator together with our Other. And when we do maybe what lies further than our deaths — the journey between the point of death to the point of our after-life (heaven I’m hoping) — is called Superposition.

Our souls are still lingering and we are neither here, neither there. Waiting for a place to be, hoping that that ‘place’ is our real home. Our own universe, back to our Creator. But yet we are stronger than ever because we FINALLY found each other, we are together, now a ‘whole’, and more than ready to get back home.
