

To catch my meals, i need to dart my sticky tongue out
and snap it backwithin 15/100ths of a second
Pretty inpressive huh?

I eat everything and anything that i can fit in my mouth
including bugs, spiders, worms, slugs and many more yummy goodness

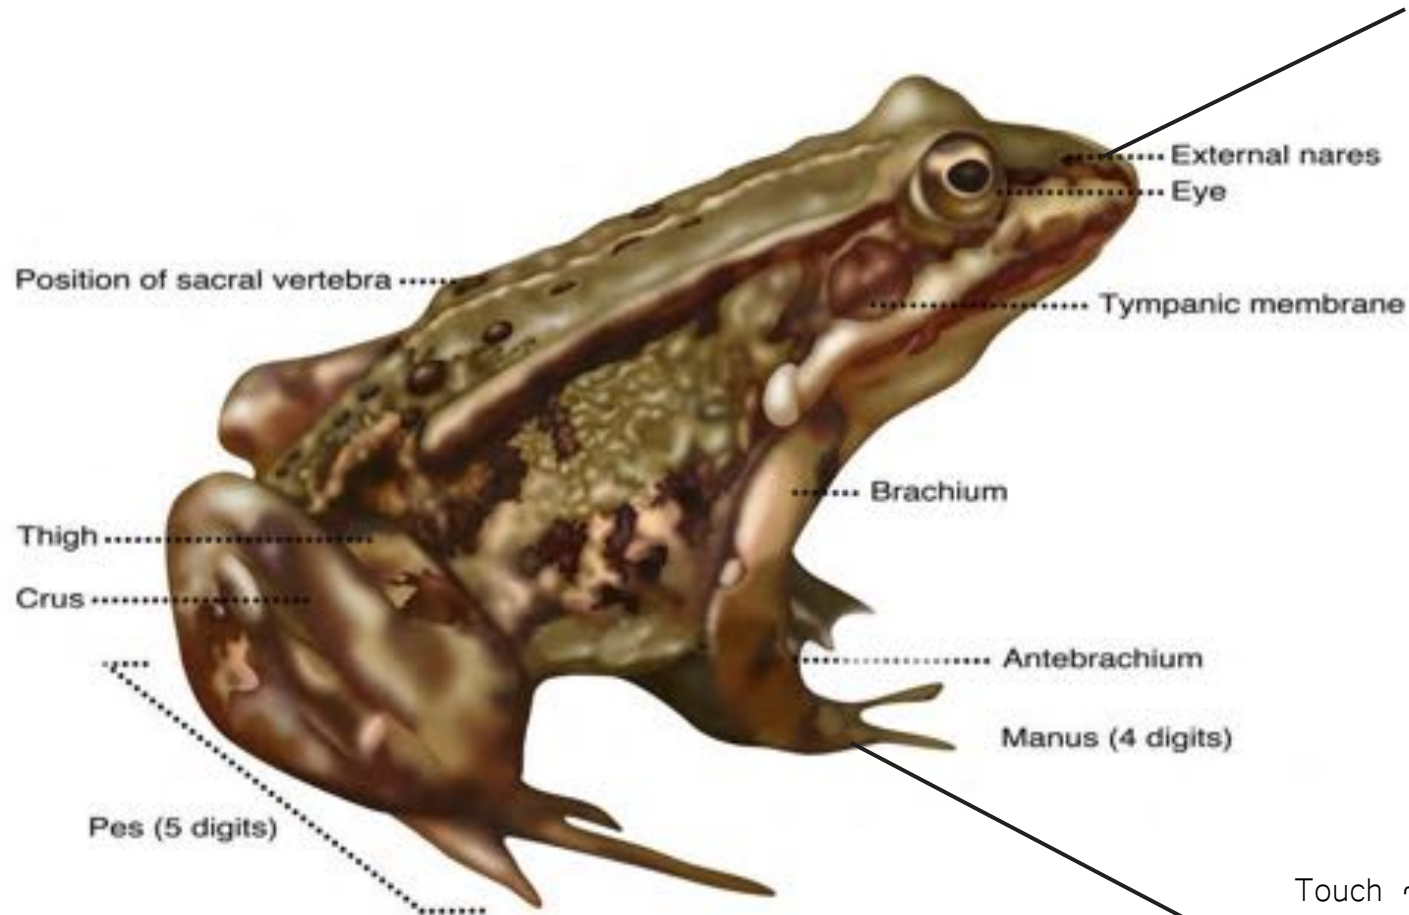

I'm famous for:
My amazing jumping abilities,
croaking sounds,
bulging eyes and
slimyyyyy skin

I need to be around areas
with a water source reproduce

ribbit ribbit ribbit
ribbit ribbit **Hominid Frog**
ribbit ribbit ribbit

2 key senses

Smell ~ Nostril

- Uses both nostrils to sample odors in the air
- second type of organ called jacobson's organ used to detect chemicals in the water

Touch ~ Hands

- Frog will seek out the smt slugs
- Place its specially adapted hands on the slug and absorb the molecules through special receptors in its finger tips

muscles stretch
and contracted
again before being
stretched again
to launch the frog
in the air

fore legs are folded
against chest and
hind legs remain
in the extended,
streamline position
for the duration of jump

muscles stretch again
at the same time
the tendon releases
its energy to produce
a powerful acceleration

land on front limbs
after accelerated jump

Exploration of creature mechanics

PAPER FROGS

literal representation
of animal
but conveys leaping
motion well

PAPER FOLDS

looks like slugs
but the intention was
to demonstrate the
extension of a
frog's leg

WOODEN SEE-SAW

when A is tapped, the
weight of B will counter
A from touching the ground.
when tapped quickly
and continuously,
the contraption will
move forward
